

CQ FLOOR

Decorative ColorQuartz Flooring System

CQ FLOOR is a decorative epoxy based floor system that is designed to produce a cleanable, decorative, slip resistant floor surface that is non porous. It's simple: the fewer seams in a floor, the less maintenance required. The average tile floor has thousands of dirt-trapping grout seams, which are impossible to keep completely clean. A linoleum floor is easily gauged and cannot be repaired when damaged. Unsealed concrete also presents problems in the form of a porous surface that is difficult to clean. The CQ FLOOR System can be used on walls, floors, stairs, counter tops or any place

where a durable resistant surface is needed. It has many advantages over Quarry Tile, Ceramic Tile and Sheet Vinyl Composition Tile and unlike concrete it is non porous making it a floor that can be cleaned easily. CQ FLOOR is ideally suited for floors found in showrooms, retail establishments, commercial kitchens, locker rooms, laboratories, garage floors and institutional areas. You will find that CQ FLOOR provides an economical alternative to other types of flooring while providing a tough durable decorative finish.

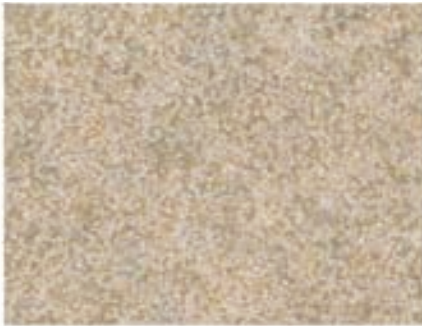

Features and Advantages:

- Monolithic, Sanitary - no seams where germs can hide
- Safe and slip-resistant
- Easy to clean just damp mop
- Durable, abrasion & wear resistant
- Can be resurfaced if damaged
- Solvent, chemical and oil resistant (proper topcoat needs to be selected)
- USDA approved for use in meat, fish, poultry & food processing
- Textures can be adjusted to meet safety requirements
- Cove Base helps provide easy cleaning at walls
- Low odor
- Economical
- Many Different Color Selections
- Great Adhesion to Concrete, Metal and Wood
